Security Posture Assessment

Discover, Evaluate, & Strengthen Your Security Posture

Celerity's Security Maturity Assessment is a comprehensive and collaborative review of your security landscape, focusing on people, process and technology.

We take a holistic view of your security maturity in order to align stakeholders, and identify gaps, strengths and weaknesses, prioritising key initiatives that can improve your security maturity. We do this via an interactive and collaborative workshop modelled on the NIST Cyber Security Framework (NIST CSF) providing actionable insights that enable the prioritisation of steps critical to advancing your security maturity.

Just 3% of organisations' cybersecurity programs include all the threat detection and response elements required to support full maturity.

The State of Cyber Defense 2023: Detection and Response Maturity Model, Kroll

The State of Cyber Defense 2023: Detection & Response Maturity Model, Kroll

✓ **Enhanced Cyber Resilience**

Identify vulnerabilities and strengthen defenses to prevent cyber threats effectively.

✓ **Strategic Roadmap for Improvements**

Receive prioritised security recommendations aligned with organisational goals.

✓ **Compliance & Risk Mitigation**

Ensure compliance with regulations while reducing legal and reputational risks.

✓ **Heightened Stakeholder Confidence:**

Demonstrate proactive cybersecurity measures, fostering trust among stakeholders and potential business opportunities.

A Collaborative Workshop with Celerity Experts:
